Comments:

1. Great job, Bruce and Claudia! Everything was right on target and I am so excited to be a part of a new process and shift in thinking that will be able to resolve some critical issues on our campus and make NWACc an even better place to work.

2. I thought we had great conversation and talked a lot about the subject matter. I am not sure though if that was the point or not, but we did talk about some important issues. I aslo am left feeling like I don't know where I stand from here, I am not sure if this means I am done with training or if there is more to come or if I should wait until I am "CALLED ON".

3. This training is not what I thought it would be. Specific templates and movement forward on the AQIP process - next steps, specific guidelines, etc… I'm not the person who should be involved in the specific discussions on retention in this particular meeting, but I should be involved in how to help other people move forward in their continuous improvement. How did this help me play a part in the systems portfolio? It was like going to learn to build a house and discussing how pretty or not pretty castles are as an example. I appreciate the opportunity, but I need details, timelines, templates, etc.

4. I would like more history on what has evolved over the past with AQIP.
