

## Committee Structure for Institutional Effectiveness, Strategic Planning and Assessment

Course level learning assessments are the responsibility of individual faculty members and are guided by the standard course outlines developed by the academic departments. Coordinators/Chairs/Deans should monitor and conduct norming exercises to ensure grading standards and learning outcomes are being met.

Academic Program assessments are the responsibility of academic chairs/coordinators and culminate in the ADHE program review reports due every 7-10 years following the state calendar. The Office of Accreditation and Assessment will survey annually for data relating to state program review.
