

IE 8 Compatibility Settings

Blackboard does not support the new Internet Explorer 8 browser. You will need to use the built-in compatibility mode to make it work for the Blackboard site. If you wish to permanently add the Blackboard site to your permissions list, the address is <http://nwacc.blackboard.com>

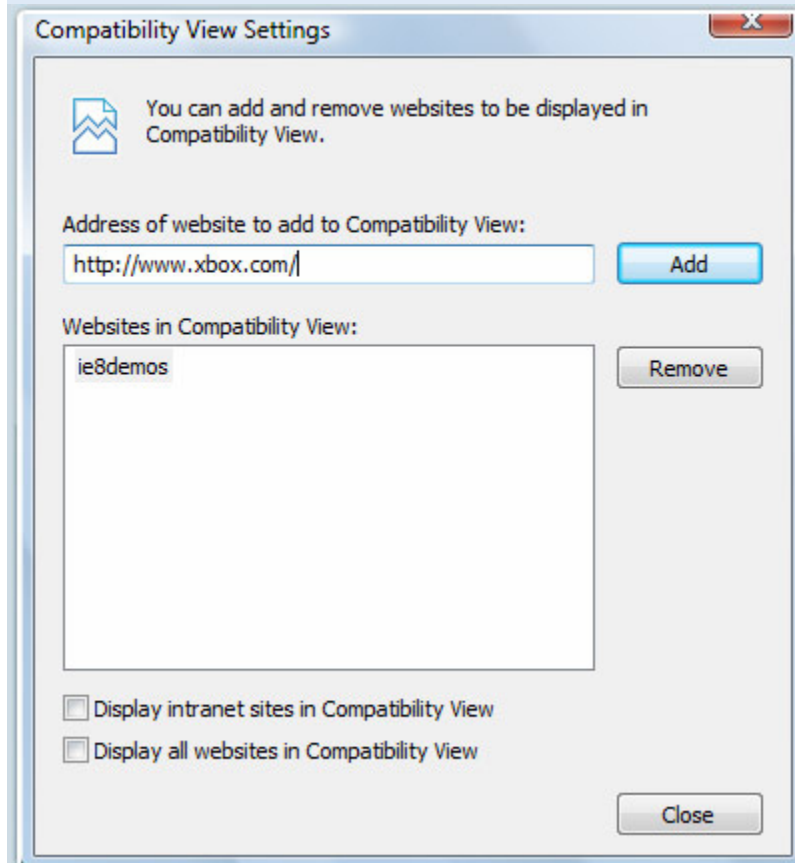

Compatibility View

Internet Explorer 8 is a new release and some websites may not yet be ready for Internet Explorer 8. Click the **Compatibility View** toolbar button to display the website as viewed in Internet Explorer 7, which will correct display problems like misaligned text, images, or text boxes. This option is on a per site basis and all other sites will continue to display with Internet Explorer 8 functionality. To go back to browsing with Internet Explorer 8 functionality on that site, simply click the **Compatibility View** button again.

Try clicking the "Compatibility View" toolbar button to fix the problem. It's located next to the Refresh button on the Address Bar.

You can maintain a list within Internet Explorer 8 for sites that should be displayed in Compatibility View. From the **Command Bar**, select **Tools**, and then select **Compatibility View Settings** to add and remove sites from this list. There are also options for viewing all websites and intranet sites in Compatibility View.

Add and remove websites to be displayed in Compatibility View.
