

## **IFB-21-004 Server Purchase Questions & Answers**

Q: The equipment mentions installation, can you clarify what level of installation would be required for this?

**A: There wouldn't be any installation. We'll set them up in the classroom and in the existing NetLab.**

Q: Is it possible to extend the bid date to give us more time to make a packet?

**A: Yes, we will move the bid opening date to May 25<sup>th</sup>, 9am.**

Q: I'd like to know if we should quote the switch as listed in the RFP or if they will accept a bid that includes Cisco's recommended replacement switch for the items they have on the RFP that are EOL. Reason being is that they'll get more life out of a new product than one that is already listed as EOL. Max they can get on a EOL product is 5 years from the EOL date

**A: It must be the switch listed. They are end of life but this is what Cisco has advised for the academy training. EOL doesn't really matter so much for us since they aren't in a production environment.**
